Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Identify the journals which are subscribed by customers. Display JournalId, JournalName and Genre of those journals. Display unique rows.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

JOURNALID	JOURNALNAME	GENRE
J201	The Hollywood Reporter	Trade
J202	Kirkus Reviews	Trade
J203	The Lancet	Scientific
J204	eLife	Academics
J205	Pulp and Paper	Trade
J206	Acta Politica	Politics
J207	Global Policy	Politics

Assignment_Subquery_JoinstoSubquery

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Display JournalName and Genre of the Journals that are subscribed. For the given requirement, query using join can be written as follows:

```
SELECT DISTINCT JournalName, Genre FROM Journal J INNER JOIN Subscription S ON J.JournalId = S.JournalId;
```

Write a query for the same requirement using an Independent Subquery without using Joins.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

JOURNALNAME	GENRE
Acta Politica	Politics
Global Policy	Politics
Kirkus Reviews	Trade
Pulp and Paper	Trade
The Hollywood Reporter	Trade
The Lancet	Scientific
eLife	Academics

Assignment_Subquery_RoundedAvgRating

Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Display the average rating of the publishers who have published journals. The output should be rounded off to the integer value.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

RATING
3

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters
Rating	NUMERIC(3,1)	NOT NULL, CHECK	rating given to the publisher, should be in the range of 1 to 5 (both inclusive)
ContactNo	NUMERIC		contact number of the publisher

Table Structure: Journal (This table provides the details of all the journals)

Assignment_Subquery_SelectiveCustomers

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Display the customer id, customer name and state of the customer(s) who reside in the same state as that of Robert. Do not display the record of Robert in the resultant set.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERID	CUSTOMERNAME	STATE
C102	Jimmy	Illinois
C104	Oliver	Illinois

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters
Rating	NUMERIC(3,1)	NOT NULL, CHECK	rating given to the publisher, should be in the range of 1 to 5 (both inclusive)
ContactNo	NUMERIC		contact number of the publisher

Assignment_Subquery_CustomerWith>1Subscription

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Display the customer id and name of those customer(s) who have taken more than one subscriptions.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERID	CUSTOMERNAME
C102	Jimmy
C103	Michael
C105	Clara
C107	Robert

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters
Rating	NUMERIC(3,1)	NOT NULL, CHECK	rating given to the publisher, should be in the range of 1 to 5 (both inclusive)

Assignment_Subquery_MinMonthlyCharges

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Identify the publisher(s) who have published a journal having minimum monthly charges across all the journals. Display the publisher id, publisher name of the identified publisher(s).

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

PUBLISHERID	PUBLISHERNAME
P106	Springer Nature

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters

Assignment_Subquery_CustomerFromSameStateDiffCity

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Identify the customers who reside in a state in which at least one other customer resides in a different city. Display CustomerId, State and City of the identified customers.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERID	STATE	CITY
C102	Illinois	Chicago
C104	Illinois	Chicago
C105	Arizona	Phoenix
C106	Arizona	Cottonwood
C107	Illinois	Galesburg

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL,	name of the publisher, cannot be more

Assignment_Subquery_SelectiveSubscriptions

Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Identify the subscription(s) for which the discount(%) is less than or equal to the average discount(%) offered on every subscription of the same journal. Display subscription id and journal id for the identified subscription(s).

Note: Write the query using Correlated Subquery concept.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

SUBSCRIPTIONID	JOURNALID
S303	J201
S305	J203
S306	J206
S307	J202
S308	J204

Assignment_Subquery_CustomerSubscriptions

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Display customer id, customer name and subscription start date for the customer(s) who have got a discount(%) which is less than the maximum discount(%) offered on any subscription that started on the same date.

Note: Write the query using Correlated Subquery concept.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERID	CUSTOMERNAME	STARTDATE
C103	Michael	2023-01-12
C105	Clara	2023-11-22
C107	Robert	2023-11-22

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters

Assignment_Subquery_Subscriptions

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

Identify the subscription(s) on which the customers have got discount(in %) more than the least discount(%) obtained by the same customer on any journal. Display CustomerName,State and Duration in months for the identified subscription(s).

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERNAME	STATE	DURATIONINMONTHS
Michael	Texas	12
Clara	Arizona	10

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters
Rating	NUMERIC(3,1)	NOT NULL, CHECK	rating given to the publisher, should be in the range of 1 to 5 (both inclusive)

Assignment_Subquery_CustomerWithNoSubscription

Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Display the customer id and name of the customer(s) who have not subscribed for any journal. (Use Exists/Not Exists)

Note: Write the query using Correlated Subquery concept.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERID	CUSTOMERNAME
C104	Oliver

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters
Rating	NUMERIC(3,1)	NOT NULL, CHECK	rating given to the publisher, should be in the range of 1 to 5 (both inclusive)
ContactNo	NUMERIC		contact number of the publisher

Assignment_Subquery_UniqueDiscountPerCustomer

Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Identify the customer(s) who have subscribed for the journal and got the discount(%), less than the maximum discount(%) offered to all other customers on the same journal. Display CustomerName and DiscountPercent for the identified customers. Do not display duplicate records.

Note: Write the query using Correlated Subquery concept.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

CUSTOMERNAME	DISCOUNTPERCENT
Amelia	7
Jimmy	0
Michael	0

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters

Assignment_Subquery_MaxMonthlyChargesPerGenre

Summary

Questions

Tryout > 1: Question 1

Problem Statement

Display the details of those journals whose monthly charge is highest in each genre. Display JournalId, JournalName, Genre and MonthlyCharges of the identified journals.

Note: Write the query using Correlated Subquery concept.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

JOURNALID	JOURNALNAME	GENRE	MONTHLYCHARGES
J201	The Hollywood Reporter	Trade	130
J203	The Lancet	Scientific	75
J206	Acta Politica	Politics	110
J208	LOS Biology	Academics	95

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
			name of the publisher, cannot be more

Assignment_Subquery_NestedQuery

Summary

Questions

<

>

Tryout > 1: Question 1

Problem Statement

Display SubscriptionId and JournalName of the Journal(s) of 'Trade' genre that have been published by a publisher whose rating is more than 3.

For the given requirement, query using join can be written as follows:

```
SELECT SubscriptionId, JournalName FROM Subscription S INNER JOIN Journal J ON S.JournalId = J.JournalId INNER JOIN Publisher P ON J.PublisherId = P.PublisherId WHERE Genre = 'Trade' AND Rating > 3;
```

Write a query for the same requirement using a Correlated Subquery(without using Joins).

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

SUBSCRIPTIONID	JOURNALNAME
S303	The Hollywood Reporter

Database Structure and Data:

Table Structure: Publisher (This table provides the details of all the publishers)

Column Name	Data Type and Size	Constraint	Description
PublisherId	VARCHAR(4)	PRIMARY KEY, CHECK	unique id of the publisher, must begin with character 'P'. For ex. P101, P102
PublisherName	VARCHAR(20)	NOT NULL, UNIQUE	name of the publisher, cannot be more than 20 characters

Assignment_Subquery_UpdateMonthlyCharges

[Summary](#)[Questions](#)

<

>

Tryout > 1: Question 1

Problem Statement

For each publisher, update the monthly charges of their journals with the average monthly charges of all the journals published by that publisher.

NOTE: In case you are using subquery, use the same alias names as given in the expected or sample output for inner and outer query.

For the given sample data, the following is the expected output.

Expected Output:

JOURNALID	JOURNALNAME	GENRE	MONTHLYCHARGES	PUBLISHERID
J201	The Hollywood Reporter	Trade	120	P105
J202	Kirkus Reviews	Trade	100	P102
J203	The Lancet	Scientific	75	P106
